PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience designing and developing scalable web applications using React.js, Next.js, TypeScript, NestJS, Node.js, and MySQL. Skilled in building responsive user interfaces, RESTful APIs, authentication and authorization systems (JWT, RBAC), and database-driven applications. Experienced in developing enterprise applications, admin dashboards, CMS platforms, and logistics management systems with a strong focus on performance, security, scalability, and user experience. Proficient in Agile/Scrum methodologies, modern frontend architecture, and cross-functional collaboration to deliver high-quality software solutions.

SKILLS

- **Frontend** : React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, Redux Toolkit, Zustand, React Query, HTML5, CSS3, SCSS, Tailwind CSS, Material UI, Shadcn/UI
- **Backend** : NestJS, Node.js, REST APIs, JWT Authentication, RBAC, TypeORM
- **Database** : MySQL, MongoDB, PostgreSQL
- **Mobile Development** : React Native, Expo
- **AI & Modern Development** : Generative AI Integration, ChatGPT, Claude AI, Cursor AI, GitHub Copilot, AI-Assisted Development
- **DevOps & Tools** : Git, GitHub, Postman, Swagger, Firebase, Figma, CI/CD

WORK EXPERIENCE

Software Developer (React Developer)

April 2026 – Present

Infinox Software Technology pvt. Ltd. | Gurugram, India

- Designed and developed a scalable Admin Panel from scratch using React.js, TypeScript, Redux Toolkit, and Tailwind CSS.
- Developed responsive dashboards, data tables, advanced forms, filters, and management modules for logistics operations and shipment tracking.
- Implemented centralized state management using Redux Toolkit, improving data consistency and application maintainability.
- Integrated RESTful APIs from ASP.NET backend services and implemented efficient data fetching, validation, and error handling.
- Built reusable UI components and frontend architecture to accelerate feature development and ensure code reusability.
- Optimized application performance, responsiveness, and user experience across modern browsers and devices.
- Collaborated with cross-functional teams in Agile/Scrum environments to deliver high-quality frontend solutions.

Software Developer (FullStack Developer)

July 2024 – December 2025

Harij Softech Solutions | Gurugram, India

- Developed scalable and high-performance Next.js applications with a focus on pixel-perfect UI and user experience.
- Implemented SSR and CSR strategies to improve application performance and SEO.
- Integrated Next.js frontend applications with NestJS REST APIs.
- Implemented JWT authentication and Role-Based Access Control (RBAC).
- Collaborated with cross-functional teams to deliver end-to-end features in Agile environments.
- Conducted code reviews, debugging, testing, and performance optimization.

Software Developer (React / React Native / Next.js)

December 2022 – July 2024

Agicent App Development Technology | Noida, India

- Built responsive and visually rich web and mobile applications using React, Next.js and React Native.
- Developed reusable UI components and optimized UI performance.
- Integrated RESTful APIs and managed application state efficiently.
- Fixed production issues, optimized performance, and supported release cycles.
- Worked closely with backend teams to ensure seamless data flow.

Software Developer (React Developer)

June 2022 – November 2022

Airygod IT

- Developed UI components using React.js.
- Integrated REST APIs and handled data rendering.
- Participated in bug fixing, testing and feature enhancements.

PROJECTS

Shipez - Digital Logistics

Role: React Developer

Tech Stack: React.js, Redux, Redux-Toolkit, Tailwind, ASP.NET, Python

- Developed and maintained a logistics management platform used for shipment tracking, status monitoring, and operational record management.
- Designed and built a scalable Admin Panel from scratch using React.js, Redux Toolkit, and Tailwind CSS.
- Created reusable and responsive UI components, dashboards, data tables, forms, and management modules to improve operational efficiency.
- Implemented centralized state management using Redux Toolkit for efficient data handling and application scalability.
- Integrated and consumed RESTful APIs from ASP.NET backend services, ensuring seamless data flow and real-time information updates.

Signfeed – Digital Signage CMS

Role: Full-Stack Developer

Tech Stack: Next.js, TypeScript, Tailwind CSS, NestJS, MySQL, RBAC, React Native

- Designed and developed a scalable CMS platform for managing digital signage across Android apps and TV screens.
- Built the complete frontend architecture using Next.js with SSR and CSR.
- Implemented Role-Based Access Control (RBAC) across the application.
- Developed backend APIs using NestJS for authentication, user management, and content handling.
- Designed MySQL schemas and Implemented secure JWT-based authentication and guards.
- Built a custom canvas editor with drag, resize, widgets, and positioning features using React-RND with Cross-browser

Haldiram – FSSAI Document Management System

Role: Full-Stack Developer

Tech Stack: Next.js, NestJS, MySQL, TypeScript

- Built a full-stack admin panel to manage FSSAI compliance documents.
- Implemented logic to upload and manage up to latest 5 documents with only one document published at a time.
- Automatically unpublished the previous document when a new PDF was published.
- Designed MySQL schema for document versioning and publish status.
- Developed frontend to display published documents publicly with restricted admin access.

EDUCATION

Bachelor of Engineering, (Computer Science)

Sant Longowal Institute of Engineering & Technology, Sangrur Punjab (Ministry of Education)

2022
